Graph theory, isomorphisms and automorphisms in, 303
Graph theory, of nonfused ring aromatic compounds, 232
Graph theory, on structure-taste relationships, 636
Graph theory, perception of rings in, 455

Hammond postulate, 728
Hellmann-Feynman theorem, in *ab initio* calculations, 75
Heterocytes, nitrogen containing, *ab initio* and molecular mechanics calculations on, 905
Hydration, of acetylcholine, 1
Hydration, of violuric acid, 11
Hydrogen bonding, *ab initio* calculations of, 362
Hydrogen bonding, in molecular mechanics, 591
Hydrophobic interactions, in QSAR, 80

Integral storage and improved I/O, in *ab initio* calculations, 148
Iron ion-water complex, *ab initio* calculations on, 819

Kinetics, solution of rate equations, 674, 689

Lennard-Jones potential, vibrational eigenvalues for, 647

Magnesium compounds, SINDO calculations on, 51
Methanimine, *ab initio* calculations on, 443
Molecular dynamics, velocity scaling in, 200
Molecular electrostatic potential, the rigorous computation of, 171
Molecular electrostatic potential, representation of, 745
Molecular mechanics calculations, of surface area, 18
Molecular mechanics, atomic charges in, 244
Molecular mechanics, calculations, of alkylbenzenes and aryl-alkylamines, 315
Molecular mechanics calculations, of chiral surface interactions, 63
Molecular mechanics, calculations on crown ethers, 111
Molecular mechanics calculations, on 1,3-dichloropropane, 684
Molecular mechanics calculations, on 2,5-dimethoxytetrahydrofuran, 189
Molecular mechanics calculations, on N heterocycles, 905
Molecular mechanics calculations, on silanes and silox acids, 709
Molecular mechanics calculations, on tyrocidine A conformations, 522
Molecular mechanics, conjugate gradient in, 650
Molecular mechanics, electrostatic calculations in, 288, 424
Molecular mechanics, hydrogen bonding in, 591
Molecular mechanics, multiple minimum problem in, 342
Molecular mechanics-NMR calculations, on glycolipids, 133
Molecular mechanics calculations, on peroxides, 851
Molecular mechanics calculations, on small-molecule protein complexes, 269
Molecular mechanics parameters, for organosilicon compounds, 25
Molecular shape, 18
Molecular shape, and chemical reactions, 608
Molecular surfaces, shape of characterization, 554
Moller-Plesset, 158
Monte Carlo calculations, on acetyl choline hydration, 1
Monte Carlo calculations on N^{α}-acetyl-N-methylphenylalaninamide hydration, 125
Monte Carlo calculations, on violuric acid, 11
Monte Carlo simulation, of a dilute aqueous solution, 819
Multiple minimum problem, 342
Multiple scattering $X\alpha(R)$ method, 890
Mutagenicity, 232

N^{α}-acetyl-N-methylphenylalaninamide, hydration of, 125
Nitrosomethanol, by semiempirical and *ab initio* calculations on, 212
NMR, ^{13}C chemical shift calculations, 416
N-nitrosamines, *ab initio* calculations on, 779

Orbitals, construction of, 356
Organosilicon compounds, 25

Parallel computations, MP2, 158
Perillartine, conformation and taste by *ab initio* calculations, 67
Peroxides, molecular mechanics of, 851
Perturbation theory, second-order terms in, 578
Phosphorus compounds, SINDO calculations on, 40
Polynucleotide helices, for generation of potential energy calculations, 861
Polypeptide secondary structure, from ^1H NMR data, 662
Projection operators, for molecular orbitals, 604
2-propen-1-imine, *ab initio* calculations on, 443
Propylamine, *ab initio* calculations on, 460
Proteins, electrostatic potentials, in solution, 327
Protein small-molecule complexes, molecular mechanics on, 269
Pseudopotential calculations, 518
Pseudopotential calculations, one-center expansion for, 298
Pseudorotation, quantum mechanics of, 336

QSAR, graph theory in mutagenicity, 232
QSAR parameters, for hydrophobic interactions, 80
QSAR, taste studies on sulfamates, 636
Quantum mechanics, of pseudorotation, 336

Radicals, heats of formation of, by semi-empirical methods, 702
Rate equations, for diffusion reaction, 689
Rate equations, solution of, 674
Reaction coordinates, from *ab initio* calculations, 465
Regioselectivity, in chemical reactions, 608
Ring aromatic compounds, nonfused, 232
Rings in graphs, perception of, 455

Rotational barriers, *ab initio* calculations of, 488
Rotational barriers, in conjugated compounds, 369

SCF procedures, for improving convergence of, 107
Schrödinger equation, application of finite-element method to, 222, 827
Semi-empirical calculations, of ^{13}C chemical shifts, 416
Semi-empirical calculations, of charge distribution, 893
Semi-empirical calculations, of chiral surface interactions, 63
Semi-empirical calculations, of conformational energy hypersurfaces, 387
Semi-empirical calculations, of rotational barriers, 369
Semi-empirical calculations, on 1,3-dichloropropane, 684
Semi-empirical calculations, on donor-acceptor complexes, 539
Semi-empirical calculations, on nitrosomethanol, 212
Semiempirical calculations, on open-shell systems, 702
Semi-empirical calculations, on phosphorus compounds, 40
Semi-empirical calculations, on silicon, aluminum, and magnesium, 51
Semi-empirical calculations, on silicon and aluminum clusters, 803
Semi-empirical calculations, symmetry in, 604
Semi-empirical calculations, $X\alpha(R)$ on diatomics, 890
Silanes, *ab initio* calculations on, 564
Silanes, molecular mechanics and *ab initio* calculations on, 25
Silanes, molecular mechanics studies on, 709
Silicon clusters, semi-empirical calculations on, 803
Silicon compounds, molecular mechanics calculations on, 244
Silicon compounds, SINDO calculations on, 51
Siloxanes, molecular mechanics and *ab initio* calculations on, 25
Siloxanes, molecular mechanics studies on, 709
SINDO calculations on, 40
Sodium borohydride, *ab initio* calculations on, 518
Solvation, atomic charges in, 91
Spin-orbit integrals, in *ab initio* calculations, 771
Stationary points on potential energy surface, computation of, 810
Structure comparisons, by least squares, 596
Structures, of polynucleotides, 861
Structure-taste relationships, 636
Sulfamates, QSAR studies on, 636
Surface area, of molecules, 18
Surfaces, shapes of, 554
Symmetry, in molecular orbital calculations, 604

Transition metal compounds, *ab initio* calculations on, 719
Tyrocidine A, conformation of, 522

Vibrational modes, in molecular electronic transitions, 924
Vibrational spectra, from *ab initio* calculations, 495
Vibration-rotation eigenvalues, for diatomics, 844
Violuric acid monohydrate, 11

Zinc sulfide clusters, *ab initio* calculations on, 581
